

# Total Control Lighting software setup

1. For now the software can be downloaded at:

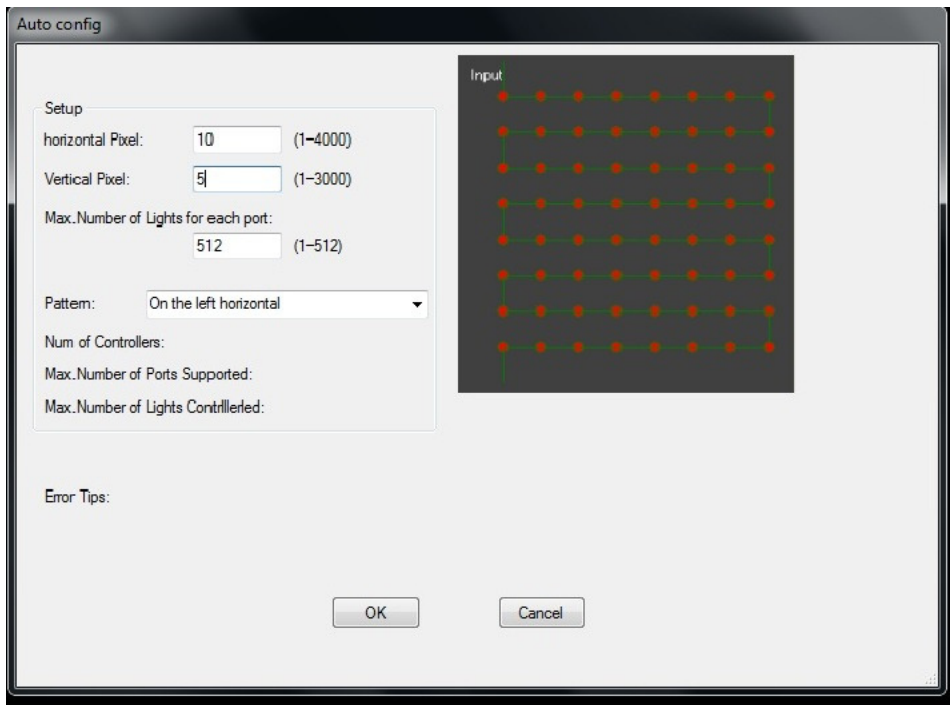

<http://coolneon.com/downloads/TCL.zip>

2. Open New Project

### 3. Project Configure

Choose Auto layout and set up the grid you are going to use:

### 4. Play!

Open a video effect, or open a Screen Shot.  
Then either record to save to SD card, or open Real Time Play.

To save to SD Card Export Effect (.led)

### **Please note:**

Total Control Lighting technology is brand new.  
This software is newly produced for us and is insanely powerful.  
Better documentation is forthcoming.  
Thank you for your patience. We look forward to feedback and collaboration.
